4. Coverage tests and covenants

Harborview CLO 2023-3 will be governed by standard overcollateralization and interest coverage tests. Failure of a Class A/B Overcollateralization Test or a Class A/B Interest Coverage Test redirects interest proceeds to pay down senior notes in sequential order until the test is cured.

- Class A/B Interest Coverage Test: minimum 120.0%.
- Class C Overcollateralization Test: minimum 114.0%.
- Class D Overcollateralization Test: minimum 108.5%.
- Interest Diversion Test: if the Class E par coverage ratio is below 104.5%, 50% of remaining interest is used to buy additional collateral or pay down notes.

5. Concentration limits

The indenture imposes the following concentration limits on the collateral principal amount. Excess amounts are treated as haircut collateral for tests.

- Largest Moody's industry: 12.0%.
- Caa bucket (Moody's Caa1 or below): 7.5%.
